

SRIRAM KASUKURTHI

+91 8985291636 | **Email:** sriramkasukurthi2109@gmail.com | **Linkedin** | **Github** | **TryHackMe** | Andhra Pradesh

PROFESSIONAL SUMMARY

SOC Analyst with hands on experience in threat detection and response, penetration testing, vulnerability assessment, and security monitoring through 4+ cybersecurity internships. Proficient in SIEM platforms including Splunk, ELK Stack, and Wazuh, along with security tools such as Metasploit, Burp Suite, and OWASP ZAP. Skilled in log analysis, incident response, MITRE ATT&CK, OWASP Top 10, network security monitoring, and Python automation for security operations

EDUCATION

Bachelor of Technology in Computer Science Engineering – Cybersecurity *July 2023 – September 2027*
Parul University – **CGPA: 7.0** Vadodara, Gujarat, India

TECHNICAL SKILLS

Cybersecurity Tools: Metasploit, Burp Suite, OWASP ZAP, Nmap, OpenVAS, Wireshark, Netcat

SOC and Defensive Security: Splunk, ELK Stack, Wazuh, Log Analysis, Alert Triage, Threat Detection and Response, Incident Response, Threat Hunting, MITRE ATT&CK, OWASP Top 10, NIST Cybersecurity Framework

Network and Infrastructure Security: Firewalls, IDS/IPS, VPN, TCP/IP Analysis, DNS Security, Traffic Analysis, Network Security Monitoring, Identity and Access Management (IAM)

Programming and Automation: Python, Bash Scripting, PowerShell

PROFESSIONAL EXPERIENCE

Cybersecurity Content and Research Associate *July 2025 – Present*
Vexorion Quantum AI *Hybrid, India*

- Conducted cybersecurity research on real-world threats, ransomware campaigns, ethical hacking methodologies, and SOC detection strategies to support technical awareness initiatives.
- Developed and published technical cybersecurity content simplifying complex concepts related to Cyber Security, Information Security for learners and professionals.
- Worked with security tools and platforms including Splunk, Wazuh, ELK Stack, Burp Suite, and OSINT frameworks to analyse attack patterns and strengthen practical cybersecurity knowledge.

AI Project Intern *January 2025 – February 2025*
EduNet Foundation with Microsoft, SAP, and AICTE *Vadodara, Gujarat, India*

- Completed a 4-week AICTE TechSaksham internship focused on developing real-world AI solutions through project-based learning and industry mentorship.
- Conducted detailed project research including problem identification, objectives, solution planning, and implementation strategy for an AI-Powered Health Assistant application.
- Developed a prototype integrating AI and Natural Language Processing (NLP) to analyse user symptoms and provide preliminary health insights through text and voice-based interaction systems.
- Participated in technical mentoring sessions, collaborative learning activities, and final project presentations evaluated by industry experts from Microsoft and SAP, earning certifications upon successful completion.

KEY CYBERSECURITY PROJECTS

PhantomNet – AI-Driven Distributed Honeypot and Threat Detection Framework

Python, FastAPI, React, Docker, PostgreSQL, Scapy, ELK Stack, Machine Learning, SIEM

- Developed an AI-driven distributed honeypot framework capable of simulating SSH, HTTP, FTP, and SMTP services to capture, analyse, and monitor malicious activities across multiple network protocols.
- Built a real-time Threat Detection and Response pipeline using Scapy, FastAPI, PostgreSQL, and machine learning models including IsolationForest and RandomForest for behavioural anomaly detection and threat scoring.
- Implemented centralised SIEM and Log Analysis workflows with ELK Stack integration, custom Kibana dashboards, threat correlation logic, and live analytics for SOC-style monitoring and alert triage.
- Designed a full-stack security operations dashboard with WebSocket-based live event streaming, predictive analytics, attacker profiling, role-based access control (RBAC)

LICENCES AND CERTIFICATIONS

Cybersecurity Foundation – Palo Alto Networks Academy

Cybersecurity Analyst Job Simulation – Tata Group

CCNA Certified – Cisco Networking Academy
